Talbot Smith

General Manager

Tal Smith, 42, was named General Manager of the Houston Astros on Thursday, Aug. 7 of last season. Smith came to Houston from the New York Yankees where he had served as executive vice president since Nov. 1, 1973.

Smith was previously with the Houston baseball organization from Nov. 1, 1960 until leaving to take a position with the Yankees of the American League's Eastern Division.

During his stay with Houston he served as assistant to the general manager (Nov. 1, 1960 until April of 1961), farm director (April of 1961 until April of 1963), assistant to the president acting primarily as liason for HSA during construction of Astrodome (April of 1963 until December of 1965), vice president and director of player personnel (December of 1965 until November of 1972), and vice president and director of operations for Astrodome-Astros Stadium Corp. One year later he went to the Yankees.

He has been in professional baseball 18 years—three with the Cincinnati Reds, 13 with Houston and two with the New York Yankees.

Smith was born on Sept. 27, 1933, in Framingham, Mass. He attended Culver Military Academy in Culver, Ind., then Duke University in Durham, N.C. He received his bachelor of arts and business administration degree from Duke in 1955. He was a lieutenant in the Air Force for two years.

His first job in professional baseball was as secretary for the farm department of the Cincinnati Reds in 1957. In March of 1958, he was named assistant farm director of the Reds. He remained in that capacity until 1960 when he joined the Houston organization.

His early professional experience includes six years in commercial radio, summer work with Sporting News Magazine in St. Louis, Mo., and newspaper assignment work for the Cape Cod Standard-Times in Hyannis, Mass.

He married Jonnie Adams in June of 1956. They have two children—Valerie (18) and Randy (12).

Tal and his family reside in Houston.

The first home run ever hit by a Houston player in the National League came on opening day of 1962—April 10. Roman Mejias connected off Chicago pitcher Don Cardwell in the third inning with two men on base. Mejias also homered off Al Lary in the eighth inning with two more men on to account for the third Colt 45s' home run of the game. Hal Smith had hit one in the third inning. The first opposition home run came in the seventh inning of the same game when the Cubs' Ernie Banks hit one off Bobby Shantz.

Cesar Cedeno led the 1975 Houston club in winning runs-batted-in with seven, while Cliff Johnson was right behind with six. Three of Cedeno's came on home runs and Johnson hit two home runs to win games—one a grand slam against St. Louis.

Two Houston players have worn number 13 in the club's history. Dick Farrell for five seasons, 1963 through 1967, and first baseman-outfielder Curt Blefary in 1969.

In Shea Stadium, New York, on July 30, 1969 Houston's Denis Menke and Jim Wynn hit grand slam home runs in the ninth inning to tie a Major League record set by Bob Allison and Harmon Killebrew of the Minnesota Twins against Cleveland on July 18, 1962.

THE ASTRODOME

1. THE WORLD'S FIRST AIR CONDITIONED ALL-PURPOSE STADIUM

The world's first air-conditioned, domed, all-purpose stadium, shining like a precious jewel in southwest Houston, Texas, was constructed by the citizens of Harris County at a cost of \$20.5 million plus \$3 million for the land on which the structure is located, and a total cost of \$31.6 million for the entire project including access roads and parking.

The stadium is leased for 40 years to the Houston Sports Association, which owns and operates Houston's National League baseball club. The HSA pays an annual lease fee of \$750,000 plus all operating costs, and has the right to sub-lease the stadium.

2. HOME OF—

- Houston Astros National League baseball team
- Houston Oilers, National Football League
- University of Houston Cougar football team
- Houston Livestock Show and Rodeo
- Conventions of all types and sizes
- Religious conclaves
- Shows and Circuses
- Championship boxing matches
- Other Sports and functions

3. STADIUM COMPLEX COVERS 260 ACRES

The stadium structure itself covers nine and a half acres of land, and the entire complex, including exhibition hall and parking area, covers 260 acres.

The outside diameter of the stadium structure is 710 feet and the floor of the stadium is approximately 25 feet below normal ground level, affording minimum vertical travel by fans.

4. COMFORTABLE CUSHIONED, UPHOLSTERED SEATING

There are 41,000 cushioned, upholstered (seat and back) theatre seats in the stadium and 4,000 pavillion seats with cushioned upholstered seats and wooden backs.

The seating capacities are 45,000 for baseball, 52,000 for football, 60,000 for conventions and a maximum of 66,000 for boxing or similar events.

Seating can be arranged to accommodate any type of sport or meeting from rodeos to national political conventions. To convert from baseball to football seating, the stands holding 10,000 seats move around on steel rails until they parallel the football sidelines.

Seating is arranged on six levels, allowing in effect, six front rows. All seats face the center of the playing area for baseball and football with the radius point of the stadium 20 feet behind second base on the baseball diamond. This means that the seats in center field stands are just as close to the center of action as some of the best seats behind home plate.

5. TWO MILLION DOLLAR SCOREBOARD

The domed stadium scoreboard is an attraction itself, featuring all pertinent sports information plus an electrical show that lasts over 40 seconds when the home team hits a home run or scores a point.

The scoreboard, built at a cost of \$2 million, is adaptable to all spectator sports and is over 400 feet long. It includes a telelite picture screen in direct center field, an automatic message board, and three additional boards for valuable information such as line-ups, scores, balls and strikes, and special plays.

Two auxiliary scoreboards also display the most pertinent information.

6. RAMPS AND ESCALATORS PROVIDE EASY ACCESS TO SEATS

Wide, low-pitched ramps and two sets of escalators provide easy access to the seats, and the entire stands can be emptied in nine minutes with a maximum crowd.

7. UNIQUE ROOF AND LIGHTING SYSTEM

The permanent roof of the dome, which has a clear span of 642 feet (twice that of any previous structure), has a maximum height of 208 feet above the playing field. This would allow the construction of an 18-story building under the roof.

The roof design consists of a steel lamella frame incorporating trussed beams arching upward to meet at the center and braced in a diamond pattern.

This steel skeleton supports a roof containing 4,596 skylights (7'2" by 3'4") each made of cast acrylic sheet.

The roof can withstand hurricane winds of 135 m.p.h. and gusts of 165 m.p.h.

The playing field is illuminated to an average brightness of 150 foot candles by 1,906 floodlights, and the total electric power consumed exceeds 18,000 KVA, more than that needed by a city of 9,000 population.

8. OVER 6,000 TONS OF AIR CONDITIONING

The stadium is completely air-conditioned with 6,600 tons of cooling capacity, costing some \$4.5 million. The system circulates 2.5 million cubic feet of air each minute. Every minute 250,000 cubic feet of fresh air is drawn into the stadium and conditioned by electronic filters and activated charcoal odor removers before being distributed through the system. Smoke and hot air are drawn out through the top of the roof.

1975 is the thirteenth spring the Houston baseball club headquartered its training activities at Cocoa, Florida.

In 1964, Houston's first at Cocoa, only Oklahoma City of the Pacific Coast League joined the parent team on the new complex. However, 1965 saw the entire system of six clubs joined together for the first time on a common training location.

Clubs training at the Cocoa facility beside the Astros are Memphis (International), Columbus, Georgia (Southern), Dubuque (Midwest) and Covington (Appalachian).

The \$800,000 modern facility was built by the city of Cocoa and is being leased to the Astros. Cocoa is located just nine miles west of Cape Kennedy, and the training area is five miles west of Cocoa.

The camp covers 52 acres and includes a lighted 5,200 seat stadium for the Astros exhibition games. There is space surrounding the stadium for parking 3,000 cars.

Aside from the large stadium, there are four additional diamonds for training of the minor league clubs. These fields are set in a wheel effect with an observation tower in the center to observe activity of all operations simultaneously.

Most of the players, as well as staff personnel, press and radio are housed in the dormitory which is located adjacent to the stadium and practice fields. The dormitory has a sleeping capacity of 268 and also features a large cafeteria seating 350, a large lobby and lounge, plus offices for both the major and minor league operations. A recreation building, located next to the dormitory, features pool, table tennis and other activities for leisure time.

The training camp has two clubhouses, one for major league players and visiting teams and one for the minor league teams. Capacity of the two units is 300 players.

This is the fifteenth spring training season for the Houston baseball club and the thirteenth at Cocoa. Houston's first two seasons in the National League the club trained at Apache Junction, Arizona.
